

Project Ajasakha - Farmers outreach Project

Date	2026-07-10	Day	N/A
Village	Unknown	Name of the Sarpanch	Ram Singh
Panchayat	Gagg	Phone Number	9872318223
Block	Unknown	Event Location	Village Gagg
District	Unknown	No of Farmers attended	3
Name of the Coordinator	Manual Upload	Female Farmers	0
Name of the Reporting Manager		Male Farmers	0
Event Start Time	10:00 AM	Event End Time	12:00 PM

Detailed Narration of the Interaction:

Translation / Dictation:

The meeting took place in Village Gagg, Block Nandpur Sahib, with the coordinator Harjinder Singh and reporting manager Namisha Mahajan in attendance. The session, which ran from 10:00 AM to 12:00 PM, involved local farmers, including Sarpanch Ram Singh. The primary objective was to introduce a new mobile application designed to assist farmers in managing agricultural challenges, providing solutions, and offering timely notifications regarding crop health and disease management. During the discussion, the farmers highlighted several issues, including a lack of awareness regarding government agricultural centers and weather forecasting services, often relying on unreliable phone-based data. They noted that they typically purchase seeds and pesticides based on recommendations from local shopkeepers rather than expert advice. Furthermore, the farmers expressed concerns about the lack of modern machinery, the decline of interest in agriculture among the younger generation, and the prevalence of specific crop diseases like leaf folder and stem borer in paddy, and yellow rust in wheat. The coordinator concluded the meeting by gathering feedback on the app, with the farmers suggesting that the application should provide real-time notifications and expert solutions for pest and disease outbreaks in their fields.

Summary:

The meeting in Village Gagg focused on introducing a new agricultural support application to local farmers. The discussion covered current farming challenges, such as reliance on local vendors for inputs, lack of access to expert agricultural information, and common crop diseases. The session concluded with the coordinator collecting feedback to ensure the app provides effective, real-time solutions for the farmers' needs.

Key Challenges Shared by the farmers

1. Lack of Knowledge: Farmers lack information regarding agricultural research centers and government schemes.
2. Unreliable Weather Information: Farmers find the weather forecasts available on their phones to be inaccurate.
3. Dependency on Local Retailers: Farmers rely heavily on local seed and pesticide store owners for advice on crop diseases and product selection, rather than expert sources.
4. Lack of Crop Insurance Awareness: There is a significant lack of information regarding crop insurance.
5. Inaccessibility of Agricultural Fairs: Farmers do not attend agricultural fairs because they are located too far away and they lack awareness about their benefits.
6. Shortage of Fertilizers: There is a scarcity of fertilizers, and local cooperative societies are reportedly operating at a loss.
7. Lack of Machinery: Farmers face a shortage of necessary agricultural machinery.
8. Challenges with Organic Farming: Organic farming is not practiced due to low yields and high labor costs.
9. Soil Issues: Some land has rocky soil, which hinders the growth of crops.
10. Pest and Disease Infestations: Farmers reported several specific issues, including:
11. Generational Shift: The younger generation is increasingly moving away from agriculture toward other jobs, leaving mostly elderly farmers to manage the fields.

Questions asked by farmers

1. What are the primary crops grown in this village?
2. Why are farmers not using soil testing services for their fields?
3. Why do farmers prefer purchasing seeds from local private shops rather than from government agricultural offices?
4. Why are farmers not aware of or utilizing the Krishi Vigyan Kendra (KVK) services?
5. Why is there a lack of awareness regarding crop insurance schemes?
6. Why do farmers not attend agricultural fairs (Kisan Melas)?
7. Why is there a lack of trust in weather forecasts provided via mobile phones?
8. What are the reasons for the current shortage of fertilizers and the financial losses faced by the local agricultural society?
9. Why is there a lack of access to modern agricultural machinery in the village?
10. Why is the younger generation in the village showing little interest in pursuing agriculture as a profession?
11. Why is organic farming not being practiced in the village?
12. What are the specific pests and diseases affecting local crops such as paddy, wheat, and maize?
